**Application:** Water Closets/Toilets, Sinks, Drinking Fountain, Horizontal Piping

**Product Family:** Pexrite

**Material:** PEX

PEXRITE turn-out. The bend support works exclusively with our HOLDRITE #103, #709 and #709-1 brackets when installing either 1/2" or 3/8" PEX tubing. The #704 functions as an "insert" and maintains centerlines between the studs without having to cut blocks of wood or use makeshift, perforated metal strapping. The Pexrite #704 can also be fastened directly to the studs when needed and two or more can be stacked.
